PROJECT SUMMARY

Bayview Services completed interior demolition work at the existing café within the Autry Museum of the American West under contract with Hathaway Dinwiddie Construction Company. The project involved selective interior demolition within the active museum environment to prepare the space for future renovations and upgrades.

Completed in February 2026, the \$59,900 project encompassed approximately 2,800 square feet and was performed by a seven-person crew led by Superintendent Jose Torres and Foreman James Castro. Due to the sensitive nature of the facility, Bayview coordinated demolition activities carefully to maintain a safe and controlled work environment while minimizing disruption to surrounding operations.

Through effective field coordination and efficient project execution, Bayview successfully completed the demolition scope safely, on schedule, and in accordance with project requirements.
