

PROJECT SUMMARY

This project began with extensive abatement operations and the safe closure of engineering systems, including elevators, cooling and heating systems, air scrubbers, fume hoods, subsurface tanks, and service lines. Following these pre-demolition activities, Bayview performed the excavation of 30,000 tons of hazardous soil, carefully segregating materials by contaminant type and transporting them to designated waste facilities for proper disposal.

INDUSTRY

- Commercial
- ↳ Multi-Unit Residential

DIVISIONS

- Environmental

California Avenue Development

📍 Palo Alto, CA

Hazardous waste removal, industrial cleaning, underground storage tanks and lines, and hazardous soil excavation

CLIENT/OWNER

Stanford University

GENERAL CONTRACTOR

Stanford University Land, Buildings & Real Estate Real Estate

DURATION

21 Months

COMPLETION DATE

July 2016

CONTRACT VALUE

\$4,313,000

PROJECT SIZE

500,000 Sqft

CREW SIZE

12 workers

* Project Code: 14024
