

PROJECT SUMMARY

Bayview Services was contracted owner-direct with Sunset Development Company to provide LEED-EB -compliant soft demolition of the former AT&T headquarters. Bayview was recognized for our environmental sustainability and awarded this project based on our ability to comply with the LEED-EB requirements and aggressive construction schedule. Three full floors with a wingspan of three football fields per floor made a lengthy load out for our crew. Bayview developed a proprietary method of C&D removal to meet the schedule and keep our crew safe. Most of the carpet was recovered under the CARE program and 6000 SF was recovered and reused on another jobsite.
