

PROJECT SUMMARY

The La Arboretum is a well-known historical botanical garden located in the city of Arcadia. The project was in the works for years, so it got plenty of attention from city officials as well as the media. The project was also highlighted by Swinerton Builders with Bayview on LinkedIn. The work consisted of removing over 50,000 SF of asphalt and concrete paving using heavy equipment. We also performed the interior and exterior selective demolition at the existing Gate House and Gift shop. The project also required asbestos abatement as well as some mold remediation. Bayview executed the work with efficiency while taking extreme care of the surrounding elements that ultimately preserved the historical integrity of the property.
