

PROJECT SUMMARY

Bayview Environmental Services, Inc. was awarded the mold remediation and demolition project at the Intel facility located in Santa Clara California. The scope of work was to remove moldy drywall which had impacted the entire 3 story building known as Building D2. The scope included the removal of the mechanical systems, including the main supply fans on the upper floor (Fan Deck) and all piping, electrical conduits, HVAC ducting, low voltage wiring, fire sprinkler systems, raised floors, and all interior finishes. The project was a combination project performed with Environmental and Demolition teams working in sequence to remove the necessary mechanical systems prior to the Environmental team coming in to prepare the mold containments and remove the moldy drywall materials. The \$3 million + dollar project was scheduled for 12 weeks. Several change orders were added to the contract including removal of overhead secondary steel support systems which was performed by Bayview Demolition Services, Inc.
