

#### PROJECT SUMMARY

This project involved the removal of interior finishes across 850,000 square feet spanning four separate buildings to facilitate comprehensive hazardous materials abatement. The abatement scope included the removal of drywall, VAT/mastic, thermal system insulation (TSI), and other hazardous materials.

Performed at a former Lockheed missile facility, the project prepared the structures for full demolition and showcased Bayview's expertise in managing large-scale, multi-building abatement and demolition projects with safety, efficiency, and precision.
