

PROJECT SUMMARY

Bayview Demolition Services was awarded this fast-paced project on the Qualcomm campus in Santa Clara. Recycling compliance exceeded the city requirements and project goals. Bayview's team faced challenges with mobilizing equipment onto this jobsite and found creative ways to "work smarter, not harder" to safely get the job done. Our original approach was to use heavy equipment, however our team decided to perform the bulk of the work by hand to minimize dust and maximize our source-separation of recyclables.
